Fall 2026–present

Career focus: Information Systems

SKILLS 03

Figma
UI design and prototyping

Supabase
App backend and API setup

Cloudflare
Domains and redirects

Communication
Group project coordination
Presentation design
Public speaking

PROFILE 04

First-year student focused on Business Analytics and Information Systems, with experience designing apps and leading group presentations. Interested in understanding what people respond to and using that insight to communicate ideas, coordinate teams, and make practical business decisions.

SELECTED PROJECT 05

Two Ideas

UI/UX Design & Editorial Curation · In development

Free Android passion project built around home-screen widgets offering one personally curated TED Talk each morning and evening.

- Designed the app's interface and logo around a small feature set: editorial notes, personal notes, and viewing history.
- Designed morning and evening home-screen widgets to let users choose a talk without browsing distracting apps.
- Watched talks before recommending them and wrote original preview notes connecting each topic to everyday life.
- Used AI tools to implement features from self-designed interfaces and requirements.

ACADEMIC LEADERSHIP 06

Group Project Lead & Presenter

Beauty and Joy of Computing · Fall 2026

- Led group proposal work, initiating tasks and helping teammates interpret unclear instructions.
- Presented group proposals and explained the team's ideas to the class.

WORK EXPERIENCE 07

Wendy's · Crew Member / Front Counter

May 2025–August 2026

Served customers at the front counter and coordinated with team members in a fast-paced service setting.
